

Travois AB 1305 Statement

Travois (including subsidiary and affiliate companies, “Travois”) provides this disclosure in compliance with the California Health and Safety Code (AB 1305), Section 44475.2, which requires disclosure of certain information about our Climate Goals (defined below), progress, and methodologies.

Emissions Marketing Claims

In 2021, we set targets to reduce our greenhouse gas (“GHG”) emissions as follows:

- **We are committed to achieving net-zero greenhouse gas emissions. Our strategy is as follows:**
 - **Onsite generation:** We generate approximately half of our electricity through our onsite solar array
 - **Purchased renewable energy:** The remaining half of our electricity demand is met through purchases from our local utility provider
 - **Carbon & Energy Attribute Offsets:** To account for paid utility usage and unavoidable emissions, we purchase Renewable Energy Certificates (RECs) and carbon offsets through the Bonneville Environmental Foundation (BEF)

Interim Progress

The current progress on our goals follows.

Scope 1 and 2 Emissions:

Our Scope 1 and 2 emissions Location-Based reduced by 21% in 2024 based on a 2019 base year.

Our Scope 1 and 2 emissions Market-Based reduced by 91% in 2024 based on a 2019 base year.

Reductions in Scope 1 and 2 emissions have been achieved through

- Investment in energy efficiency measures in our Head Office including EPA Energy Star equipment and light sensors to reduce energy consumption based on office usage

- We have onsite solar panels and purchase Renewable Energy Credits (RECs) to account for the energy we source from the grid.

Scope 3 Emissions:

Our Scope 3 emissions reduced by 31% in 2024 based on a 2019 base year.

Reductions in Scope 3 emissions have been achieved through

- Increase in remote work that has led to less employee commuting time
- Decrease in business travel

| GHG BY SCOPE | MT CO2e | MT CO2e | MT CO2e | MT CO2e | MT CO2e | MT CO2e |
|---------------------------------------|--------------------|--------------------|--------------------|--------------------|--------------------|--------------------|
| | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 |
| Scope 1 | 52.9 | 44.7 | 45 | 49.86 | 8.63 | 10.37 |
| Scope 2 Location Based | 67 | 45 | 56 | 84.00 | 77.00 | 83.92 |
| Scope 2 Market Based | 67 | 45 | 0 | 0.00 | 0.00 | 0.00 |
| Scope 3 | 410 | 185 | 372 | 312.30 | 210.00 | 284.79 |
| Total All Scopes | 529.9 | 274.7 | 416.73 | 362.16 | 218.63 | 295.17 |
| | | | | | | |
| % Change Scope 2 YOY | | -48% | 52% | -13% | -40% | -35% |
| | | | | | | |
| Total emissions % change on Base Year | | -48% | -21% | -32% | -59% | -44% |

Net Zero Claim

Travois has a claim that we aspire to be a net-zero company. Our claim is based on the annual measurement of our Greenhouse Gas emissions, the reduction of our emissions across all three scopes (combined reduction of 44%), followed by the purchase of carbon offsets to supplement our internal efforts.

We began offsetting our emissions annually in 2022, and have updated our reporting and carbon offset purchase annually since then.

Emissions Calculation Methodology and Science-based Targets / Emissions Reduction Pathway

Travois calculates its GHG emissions and progress towards achieving its Climate Goals in accordance with the Greenhouse Gas Protocol Corporate Accounting and Reporting Standard (Revised Edition) and the Corporate Value Chain (Scope 3) Standard. Our claims are based on total Scope 1 and 2 emissions and the following categories as part of Scope 3

- Scope 3 Category 3, Fuel & Upstream Emissions
- Scope 3, Category 6, Business Travel
- Scope 3, Category 7, Employee Commuting

Assurance

Travois' goals are not independently assured currently.

Renewable Energy Credits (RECs)

We purchased 102 MWh of RECs via the Bonneville Environmental Fund for the Interstate Solar Project, Commissioned in January 2019, Interstate Solar PV Park is a 74.5 MW ground-mounted solar project which is spread over an area of 419 acres near Port St. Lucie, Florida. The project supplies enough clean energy to power 15,000 households and consists of 330,000 modules.

20% of our REC purchases also directly support BEF's Tribal Renewable Energy Fund (TREF), an initiative that promotes energy independence, climate resilience, and cost reduction for Native Nations. This fund has contributed to projects such as:

- Solar installation at a youth center for the Coeur d'Alene Tribe
- Multiple Native projects through the nonprofit GRID Alternatives
- Workforce development and energy education programs supporting tribal communities

Voluntary Carbon Offsets

We have purchased voluntary carbon offsets that help the company achieve its carbon neutrality goals. The carbon offset purchases are described below:

Project identification number: CAR422

Business Entity Selling the Offset: [Bonneville Environmental Foundation](#)/Green-e®
Certified

Offset registry: Climate Action Reserve

Project name as listed in the registry: Hernando County Landfill Electric Generation

Credits Purchased: 645,954 pounds of carbon dioxide equivalent (CO₂e) (equivalent of
293 MT CO₂e)
